Work Experience

Planned Career Break

Cleveland, OH

Took intentional time off to spend time with family and focus on developing software skills.

Jun 2021 – Present

- Developed practical knowledge of modern web development framework and tools through online courses, including using React.js with TypeScript, styling websites using Tailwind CSS / CSS, and version controlling with Git/GitHub.
- Built and deployed personal web projects to apply learnings (see kvnzhao.com/projects for additional details).

Special Projects & Operations Senior Associate | Sprinly, Inc.

Cleveland, OH

Directly supported COO / Co-Founder of fast-growing startup, owning and leading initiatives in several company functions, including eCommerce website management, customer support, packaging & logistics, and growth projects.

Oct 2020 - Jun 2021

- Led eCommerce platform migration from WordPress to Shopify, upgrading internal tools and processes to enable business continuity, and serving as primary interface with external agency to ensure on-spec delivery of new site.
- Improved site conversion rates by 30% using A/B tests within checkout funnel, leading on hypothesis formation by analyzing customer behavior in Google Analytics and test deployment by using VWO and custom JavaScript code.
- Designed and implemented detailed tracking and reporting dashboards to enable visibility on several KPIs, including reducing excess inventory on-hand, excess credits & refunds given, and improving product ratings.
- Reduced time spent on customer account management by 50% through automation using Python scripts and teaching customer support team members how to use them.

Project Manager | ExxonMobil

Spring, TX

Responsible for leading small (under \$30M) and supporting large (over \$30M) capital projects for business units in the Americas and West Africa. Held multiple special assignments across company functions, including HR, Audit, and IT.

Aug 2017 - Sept 2020

- Managed a portfolio of 5 projects totaling \$58M across several disciplines (electrical, subsea, civil, and construction), directly owning budget, schedule, and execution on behalf of business partners.
- Developed project plan for \$60M subsea installation campaign, establishing procurement and execution strategies, determining cost & schedule estimates, and preparing final materials used in funding request.
- Assisted senior management in implementing re-organization affecting 2,000 individuals, helping maintain dashboards used in designing organization structure and progress tracking, and developing onboarding materials.
- Coordinated onboarding and assimilation of 14-person engineering class, ensuring individuals are trained on company safety standards and qualified for field rotations to production facilities as a part of new hire program.

Summer Analyst | Joy Capital

Beijing, China

Helped evaluate investment opportunities and technologies in electric vehicle industry.

Aug 2016 - Sept 2016

Assessed technologies used by 14 startups along EV industry value chain and presented to investment partners.

Process Engineering Intern | Dow, Inc.

Midland, MI

Focused on optimization of pollutant separation using various adsorption materials.

Jun 2016 - Jul 2016

• Constructed hypothesized mechanisms for 6 materials by collecting and analyzing breakthrough curve data.

Research & Development Intern | The Goodyear Tire & Rubber Company

Akron, OH

Performed research in wet labs, focusing on branching occurrences during polymer synthesis.

Jun 2015 - Sept 2015

- Improved polymer production by 20% by identifying impact of time during synthesis of catalyst on reaction quality.
- Conducted 30+ experiments to determine impact of 2 variables, monomer concentration and modifier type, on polymer synthesis and communicated results to process engineers.

Education

Northwestern University, McCormick School of Engineering

Evanston. IL

B.S. in Chemical Engineering, Minor in Economics (Class of '17)

GPA - 3.72 / 4.00

Skills

Coding: JavaScript (incl. React.js, Node.js), Python (incl. Numpy, Pandas), CSS, HTML, Git, NoSQL (incl. MongoDB). Tools: PowerBI, Basecamp, Asana, Notion, Excel / Sheets, SharePoint, VWO. Languages: Mandarin Chinese.
